- Generate Stress Isometrics
- I-Configure

Output Tab

Provides commands for output of piping or structural calculations.

Static

Main window ribbon: **Home** > **Reports** > **Static** 

Main window ribbon: **Output** > **Reports** > **Static** 

In the **Classic Piping Input** window:

CAESAR II Tools toolbar: **View Static Results** 

Opens the Static Output Processor and displays the results of a static analysis.

New Analysis Reviewer

Main window ribbon: **Home** > **New Analysis Reviewer** 

Main window ribbon: **Output** > **Reports** > **New Analysis Reviewer** 

In the **Classic Piping Input** window:

CAESAR II Tools toolbar: **View Static Results** 

In the **Static Output Processor** window:

Options menu > **New Analysis Reviewer** 

Standard toolbar: **New Analysis Reviewer** 

Opens the New Analysis Reviewer, which provides advanced, flexible options for reviewing output results and building reports.

 **NOTE** This command is not available when **Classic Output Processor** is selected for Preferred Output Reviewer in the Configuration Editor.

Harmonic

Main window ribbon: **Output** > **Reports** > **Harmonic** 

Opens the Dynamic Output Window and displays harmonic loading results.

Spectrum/Modal

Main window ribbon: **Output** > **Reports** > **Spectrum/Modal** 

Opens the Dynamic Output Window and displays natural frequency/mode shape calculations or uniform/force spectrum loading results.

Time History

Main window ribbon: **Output** > **Reports** > **Time History** 

Opens the Dynamic Output Window and displays time history load simulation results.

Static Animation

Main window ribbon: **Output** > **Animations** > **Static** 

Static Output Processor menu: **Options** > **View Animation** 

Static Output Processor Standard toolbar: **View Animation** 

Shortcut key:

- **ALT+M - Motion**

Displays animated graphic simulations of static analysis results. See View Animation.

Harmonic Animation

Main window ribbon: **Output** > **Animations** > **Harmonic** 

Opens the DynPlot Window (Dynamic Output Animation) and displays animated graphic simulations of harmonic loading results.

Mode Shapes Animation

Main window ribbon: **Output** > **Animations** > **Mode Shapes** 

Opens the DynPlot Window (Dynamic Output Animation) and displays animated graphic simulations of natural frequency/mode shape calculations or uniform/force spectrum loading results.

Time History Animation

Main window ribbon: **Output** > **Animations** > **Time History** 

Opens the DynPlot Window (Dynamic Output Animation) and displays animated graphic simulations of time history load simulation results.

Generate Stress Isometrics

Main window ribbon: **Home** > **Reports** > **Generate Stress Isometrics** 

Main window ribbon: **Output > Isogen > Generate Stress Isometrics** 

Starts CAESAR II Isometrics. See Generate Stress Isometrics.

I-Configure

Main window ribbon: **Output > Isogen > I-Configure** 

Starts Alias I-Configure.
